If sufficient data are not available to determine a CCA for the week, regulations governing the CCA require that the latest available CCA will remain in effect. The current CCA of 0.00 cents per pound will remain in effect through 12:00 p.m. Eastern Time, Thursday, July 13, 2023.

The Agricultural Act of 2014 provides that the AWP may be further adjusted if the Secretary determines adjustment is necessary to 1) minimize potential loan forfeitures, 2) minimize accumulation of Government stocks, 3) ensure free and competitive marketing of upland cotton, both domestically and internationally, and 4) ensure an appropriate transition between current-crop and forward-crop price quotations. No adjustment has been made this week.

Because the AWP for the period exceeds 52.00 cents per pound, which is the base quality loan rate, the loan repayment rate during this period is equal to the loan rate, adjusted for the specific quality plus applicable interest and storage charges. The marketing loan gain/loan deficiency payment rate of 0.00 is the difference, if positive, between the base loan rate of 52.00 cents and the AWP.
