**WASHINGTON, Oct. 4, 2024** – In the aftermath of Hurricane Helene, which devastated communities, homes, farms and businesses across parts of the Southeast, the U.S. Department of Agriculture (USDA) has deployed staff to assist with response and recovery efforts. USDA is also putting in place contingency plans and program flexibilities to ensure farmers, and foresters and communities are able to get the support they need. USDA is sharing information today to help impacted people learn about resources that may be available to them.

On Thursday, Agriculture Secretary Tom Vilsack and Farm Service Agency Administrator Zach Ducheneaux traveled to Florida and Georgia with President Biden to assess damage and meet with farmers and residents in the wake of the storm. In remarks, Secretary Vilsack highlighted that USDA is taking measures like extending program signup opportunities and using waivers and emergency procedures to expedite recovery efforts on America's working lands. The department has also deployed 190 staff, including many from the U.S. Forest Service, to assist with response efforts, including removal of debris from roads.

“At USDA, our thoughts and prayers go out to all the families and farmers who have been impacted by this storm,” said Agriculture Secretary Tom Vilsack. “Our job is to try to keep farms viable and operational, to help rural communities remain resilient, and at the end of the day to get as much help as quickly as possible to as many people as possible.”

Here are steps USDA wants farmers to know about to ensure they can access the tools and resources that USDA offers:

## **How to Contact USDA**

USDA has offices in virtually every county. However, some remain obstructed or without power due to the storm. Other USDA offices in affected states are stepping up to help triage and take producers' calls. The Farm Service Agency Call Center, available at 877-508-8364, can help direct producers to available staff. More program information is also [farmers.gov](https://farmers.gov).

Leaders with USDA's Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS), and Risk Management Agency (RMA) will hold a virtual briefing on Monday, Oct. 7 at 11 a.m. EDT for agricultural producers and stakeholders to share information on disaster assistance programs for agricultural operations. Visit [farmers.gov/hurricane](https://farmers.gov/hurricane) for details on how to join.

Through the Farm and Ranch Stress Assistance Network, USDA also partners with several organizations to offer mental health resources. Anyone in need of extra support in light of stressful circumstances is encouraged to contact the [Southern Ag Exchange Network Farmer Support Hotline](https://southernagexchange.com/farmer-support-hotline) at 888-381-7243, which is available 24/7.

## **Expediting Crop Insurance Payments**

USDA estimates there are more than 38,000 crop insurance policies, covering more than 4.8 million acres, in place in the affected areas. USDA has instructed crop insurance companies to expedite loss adjustments that are necessary to make payments, and we expect payments to be made within 30 days. If you have [Federal crop insurance](https://farmers.gov/federal-crop-insurance), contact your crop insurance agent as soon as crop or livestock losses are apparent.

## **Documenting and Reporting Losses**

USDA reminds producers to document damages and losses, including gathering farm records, herd inventory, receipts and pictures of damages or losses. USDA advises livestock producers to document livestock numbers by taking time and date-stamped video or pictures of injury or loss, to the extent possible. USDA asks producers to report crop, livestock and farm infrastructure losses to FSA at your local USDA Service Center. Producers can call the FSA Hotline for assistance if their local Service Center is currently closed.

## **Flexibilities for Disaster Assistance Programs**

In addition to RMA's Federal crop insurance flexibilities, FSA has added flexibilities to several programs. A full list of FSA disaster assistance programs is available on the [Hurricane webpage](https://farmers.gov/hurricane-webpage) on [farmers.gov](https://farmers.gov).

To help expedite assistance through the [Emergency Conservation Program \(ECP\)](#) and [Emergency Forest Restoration Program \(EFRP\)](#), FSA has taken the following measures:

- Extended ECP and EFRP signup that begins Oct. 15, 2024, and runs through June 1, 2025, in states affected by Hurricane Helene.
- Executed Emergency Response (ER-850) authorization of emergency National Environmental Policy Act (NEPA) circumstances to expedite FSA approval of practices involving surface debris removal, fence restoration and non-ground disturbing activities.
- Waiver of onsite inspection requirement for non-engineering practices for ECP and EFRP.
- Waiver of requirement for producers to obtain prior approval to conduct surface debris removal, fence repair and hazard tree removal to support critical disaster recovery efforts. Producers should contact FSA for any questions on allowable activities.

Additionally, the [Livestock Indemnity Program \(LIP\)](#) provides benefits to livestock owners and contract growers for livestock deaths in excess of normal mortality caused by eligible loss conditions including eligible adverse weather. FSA has issued guidance to FSA County Committees and local staff to exercise maximum flexibility in determining acceptable loss documentation and to ensure LIP applications are acted on timely.

Through the [Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program \(ELAP\)](#), FSA provides assistance to owners of livestock, and producers of honeybees and farm-raised fish for feed and death losses due to an eligible natural disaster event. FSA is providing assistance to help cover above normal costs to transport livestock to feed and/or transport feed/forage to livestock in hurricane-impacted states, and assistance to help cover above normal costs to haul water to livestock in hurricane-impacted states.

The [Tree Assistance Program \(TAP\)](#) provides financial cost-share assistance to qualifying orchardists and nursery tree growers to replant or, where applicable, rehabilitate eligible trees, bushes and vines lost by natural disasters. FSA has extended assistance to trees, bushes and vines that have not died but are no longer capable of production (not economically viable). This assistance program complements the [Noninsured Crop Disaster Assistance Program \(NAP\)](#) or federal crop insurance coverage, which covers the crop but not the plants or trees in all cases.

Under NAP, FSA has waived the 72-hour notification requirement on hand harvested crops, extended deadline to file a Notice of Loss, and provided flexibility for FSA staff to perform loss adjustment activities and/or waive field inspections in cases where the cause of loss can be verified through other means.

For producers with [Marketing Assistance Loans](#) (MAL), FSA is providing additional time for producers to deliver commodities to a buyer to repay MALs with sale proceeds and postponing MAL foreclosure letters applicable to losses or damages due to hurricanes for up to 90 calendar days.

A full list of FSA disaster assistance programs is available on the [Hurricane webpage on farmers.gov](#).

USDA's Natural Resources Conservation Service (NRCS) also offers recovery options for producers through the [Environmental Quality Incentives Program](#) (EQIP) and for communities through the [Emergency Watershed Protection Program](#) (EWP). Learn more on the [NRCS Disaster Recovery webpage](#).

## **Nutrition Assistance**

USDA's Food and Nutrition Service, at states' request, has already issued flexibilities and waivers at the for its many nutrition programs in Florida, Georgia, Kentucky, Ohio, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia, in order to help emergency meal providers reach more people quickly. USDA is ready to issue additional flexibilities upon request. More information on those recovery and assistance efforts can be found on the [FNS Disaster Assistance webpage](#).

## **More Information**

Additional USDA disaster assistance information can be found on [farmers.gov](#), including the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), [Loan Assistance Tool](#), and [Natural Disasters and Crop Insurance fact sheet](#). Additionally, FarmRaise offers an [FSA educational hub](#) with LIP and ELAP decision tools as well as farm loan resource videos.

USDA Rural Development is already communicating with local governments about how their resources can help assist with the long-term recovery of impacted rural communities. Additionally, Rural Development is looking at flexibilities within existing programs for communities impacted to address housing assistance for tenants and homeowners, water infrastructure needs, support to rural businesses, and existing participants of our Electric and Community Facilities programs. Additional information for impacted rural communities and current Rural Development customers can be found on the [Rural Development Disaster Assistance](#) site.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
