WASHINGTON, **June 22**, **2023** – The U.S. Department of Agriculture (USDA) today announced its selection of 50 projects for potential award, totaling approximately \$300 million. These innovative projects will help improve access to land, capital, and markets for underserved farmers, ranchers, and forest landowners. The Increasing Land, Capital, and Market Access (Increasing Land Access) Program, which is funded by President Biden's Inflation Reduction Act, works to increase access to farm ownership opportunities, improve results for those with heirs' property or fractionated land, increase access to markets and capital that affect the ability to access land, and improve land ownership, land succession and agricultural business planning.

"Land access, market access and capital are critical to the success of the hardworking producers who keep agriculture thriving," said Jim Barber, FSA State Executive Director in New York. "Underserved producers have not had access to the amount of specialized technical support that would increase opportunities to access and capital and benefit the launch, growth, resilience, and success of their agricultural enterprises. The Increasing Land Access Program is part of the Biden-Harris administration's commitment to advancing equity for all, including people who have been underserved, marginalized, and adversely affected by inequality, by providing the resources, tools and technical support needed to directly help local farmers and ensure we have a strong agricultural system across the country."

Examples of selectees for potential award in New York include:

- Creating a Pathway to Land Ownership for Immigrants, Refugees, and Underserved
 Farmers in MA, ME, NY, and FL- World Farmers Inc. will work with immigrants, refugees, and
 underserved farmers to increase farmland ownership and access for underserved farmers,
 transition open land into viable farmland, and preserve farmland in perpetuity all while enhancing
 immigrant and refugee farmers' business viability and utilization of USDA programs and services
 with utilization of USDA programs and services.
- Increasing Land, Capital, and Market Access for Marginalized Farmers Khuba International has long-term goals to (1) support BIPOC moderate to experienced farmers to gain access to Federal, State, and Local resources to support and sustain their farming efforts and (2) provide farmland governance and ownership opportunities to BIPOC growers and farmers, this Project, Increasing Land, Capital, and Market Access for Marginalized Farmers, facilitated by the Quarter Acre for the People (QAP), a program of Khuba International, gives direct attention to BIPOC farmers in the early to mid-stages of managing farmland land in a way that embodies ecologically-sound and community-engaged stewardship principles and facilitates the target audience to shift from surviving as farmers to thriving as farmers.

The tentative selectees include national, regional, and local projects that cover 40 states and territories including Washington D.C., Puerto Rico, and the U.S. Virgin Islands. USDA will work with the selected applicants to finalize the scope and funding levels in the coming months.

See the full list of Increasing Land Access Program selected projects.

Environmental Assessment

These projects will likely result in the purchase of land, construction of farm infrastructure and other activities that could have potential impacts on environmental resources. USDA has developed a Programmatic Environmental Assessment for the Increasing Land Access Program to evaluate the program's overarching environmental impacts as they relate?to the National Environmental Policy Act.

The environmental assessment is available <u>online for public review</u>. USDA is requesting comments on the program's potential impact on the environment. The feedback will be incorporated into the final assessment, as appropriate, prior to a decision.

USDA will consider comments received by Friday, July 14, 2023, at 5 p.m. EDT. Comments received after that date will be considered to the extent possible. Comments may be submitted:

More Information

The Increasing Land Access Program was <u>originally announced in August 2022</u> as part of a broader investment to help ensure underserved producers have the resources, tools, programs and technical support they need to succeed and is being funded by the Inflation Reduction Act.

The Increasing Land Access Program is part of USDA's commitment to equity across the Department and steps it has taken under Secretary Vilsack's direction to improve equity and access, eliminate barriers to its programs for underserved individuals and communities, and build a workforce more representative of America. Earlier in the year, the USDA Equity Commission, which is comprised of independent members from diverse backgrounds, released its interim recommendations to remove barriers to inclusion and access at USDA. The program is also an important component of the Department's and President Biden's vision to Advance Racial Equity and Support for Underserved Communities Through the Federal Government.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production; fairer markets for all producers; ensuring access to safe, healthy and nutritious food in all communities; building new markets and streams of income for farmers and producers using climate smart food and forestry practices; making historic investments in infrastructure and clean energy capabilities in rural America and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
