Together We Can End COVID-19

Locate a COVID-19 Vaccine Provider Near You

Across the country, the COVID-19 pandemic has been devastating, but the light is at the end of the tunnel. The United States now has safe, highly effective vaccines that protect you and your family from getting sick. They offer an opportunity to return to normalcy in our everyday lives. Getting the COVID-19 vaccine gives you an added layer of protection and could protect your coworkers, family, and friends.

Some may have concerns, and that is perfectly reasonable. USDA believes we can trust what doctors and scientists are saying. COVID-19 vaccines are safe, effective, and will save lives. Millions of people have already safely received these life-saving vaccines.

USDA is encouraging our employees to get the vaccine as soon as they have access to one, and as our offices begin to reopen, we also encourage customers our staff may encounter in the workplace to get one. More and more states are increasing the number of COVID-19 vaccines available to their residents.

If you want to know more about COVID-19 vaccines or search for vaccine providers near you, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/faq.html>

Help be a part of the solution. You are a key player in our nation's effort to end this pandemic for good. Together, we can do this.

Maintaining Good Credit History

Farm Service Agency (FSA) loans require applicants to have a satisfactory credit history. A credit report is requested for all FSA direct farm loan applicants. These reports are reviewed to verify outstanding debts, see if bills are paid timely and to determine the impact on cash flow.

Information on your credit report is strictly confidential and is used only as an aid in conducting FSA business.

Our farm loan staff will discuss options with you if you have an unfavorable credit report and will provide a copy of your report. If you dispute the accuracy of the information on the credit report, it is up to you to contact the issuing credit report company to resolve any errors or inaccuracies.

There are multiple ways to remedy an unfavorable credit score:

- Make sure to pay bills on time
 - Setting up automatic payments or automated reminders can be an effective way to remember payment due dates.
- Pay down existing debt
- Keep your credit card balances low
- Avoid suddenly opening or closing existing credit accounts

FSA's farm loan staff will guide you through the process, which may require you to reapply for a loan after improving or correcting your credit report.

For more information about farm loans, contact your local [USDA Service Center](#) or visit fsa.usda.gov.

Supervised Credit from FSA

Farm Service Agency (FSA) farm loans are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Our goal is to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. FSA staff will advise borrowers on developing strategies and a plan to meet your goals and graduate to commercial credit. FSA borrowers are responsible for the success of their farming operation, but FSA staff will help in an advisory role, providing the tools necessary to help you achieve your operational goals and manage your finances.

For more information about farm loans, contact your local [USDA Service Center](#) or visit fsa.usda.gov.

Disaster Assistance Available for Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to you for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

For 2021 livestock losses, you must file a notice within 30 calendar days of when the loss is first apparent. You then must provide the following supporting documentation to your local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of grower's contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 250 pounds) = 5%. These established percentages reflect losses that are considered expected or typical under "normal" conditions.

In addition to filing a notice of loss, you must also submit an application for payment by March 1, 2022.

For more information, contact your local [USDA Service Center](#) or visit fsa.usda.gov.

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it's important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of

environmental review is required for your program application so that it can be completed timely.

USDA Expands and Renews Conservation Reserve Program

USDA Expands and Renews Conservation Reserve Program in Effort to Boost Enrollment and Address Climate Change

Agriculture Secretary Tom Vilsack announced that USDA will open enrollment in the Conservation Reserve Program (CRP) with higher payment rates, new incentives, and a more targeted focus on the program's role in climate change mitigation. Additionally, USDA is announcing investments in partnerships to increase climate-smart agriculture, including \$330 million in 85 Regional Conservation Partnership Program (RCPP) projects and \$25 million for On-Farm Conservation Innovation Trials. Secretary Vilsack made the announcement today at the White House National Climate Task Force meeting to demonstrate USDA's commitment to putting American agriculture and forestry at the center of climate-smart solutions to address climate change.

The Biden-Harris Administration is working to leverage USDA conservation programs for climate mitigation, including continuing to invest in innovation partnership programs like RCPP and On-Farm Trials as well as strengthening programs like CRP to enhance their impacts.

Conservation Reserve Program

USDA's goal is to enroll up to 4 million new acres in CRP by raising rental payment rates and expanding the number of incentivized environmental practices allowed under the program. CRP is one of the world's largest voluntary conservation programs with a long track record of preserving topsoil, sequestering carbon, and reducing nitrogen runoff, as well providing healthy habitat for wildlife.

CRP is a powerful tool when it comes to climate mitigation, and acres currently enrolled in the program mitigate more than 12 million metric tons of carbon dioxide equivalent (CO₂e). If USDA reaches its goal of enrolling an additional 4 million acres into the program, it will mitigate an additional 3 million metric tons of CO₂ equivalent and prevent 90 million pounds of nitrogen and 33 million tons of sediment from running into our waterways each year.

CRP's long-term goal is to establish valuable land cover to help improve water quality, improve soil health and carbon sequestration, prevent soil erosion, and reduce loss of wildlife habitat. USDA's Farm Service Agency (FSA) offers a number of signups, including the general signup and continuous signup, which are both open now, as well as a CRP Grasslands and pilot programs focused on soil health and clean water.

New Climate-Smart Practice Incentive

To target the program on climate change mitigation, FSA is introducing a new **Climate-Smart Practice Incentive** for CRP general and continuous signups that aims to increase carbon sequestration and reduce greenhouse gas emissions. Climate-Smart CRP

practices include establishment of trees and permanent grasses, development of wildlife habitat, and wetland restoration. The Climate-Smart Practice Incentive is annual, and the amount is based on the benefits of each practice type.

Higher Rental Rates and New Incentives

In 2021, CRP is capped at 25 million acres, and currently 20.8 million acres are enrolled. Furthermore, the cap will gradually increase to 27 million acres by 2023. To help increase producer interest and enrollment, FSA is:

- **Adjusting soil rental rates.** This enables additional flexibility for rate adjustments, including a possible increase in rates where appropriate.
- **Increasing payments for Practice Incentives from 20% to 50%.** This incentive for continuous CRP practices is based on the cost of establishment and is in addition to cost share payments.
- **Increasing payments for water quality practices.** Rates are increasing from 10% to 20% for certain water quality benefiting practices available through the CRP continuous signup, such as grassed waterways, riparian buffers, and filter strips.
- **Establishing a CRP Grassland minimum rental rate.** This benefits more than 1,300 counties with rates currently below the minimum.

Enhanced Natural Resource Benefits

To boost impacts for natural resources, FSA is:

- **Moving State Acres for Wildlife Enhancement (SAFE) practices to the CRP continuous signup.** Unlike the general signup, producers can sign up year-round for the continuous signup and be eligible for additional incentives.
- **Establishing National Grassland Priority Zones.** This aims to increase enrollment of grasslands in migratory corridors and environmentally sensitive areas.
- **Making Highly Erodible Land Initiative (HELI) practices available in both the general and continuous signups.**

Expanding Prairie Pothole Soil Health and Watershed Programs

CRP has two pilot programs — the Soil Health and Income Protection Program (SHIPP) and the Clean Lakes, Estuaries and Rivers 30-year contracts (CLEAR30).

- For SHIPP, which is a short-term option (3, 4, or 5-year contracts) for farmers to plant cover on less productive agricultural lands, FSA will hold a 2021 signup in the Prairie Pothole states.
- The CLEAR30 pilot, a long-term option through CRP, will be expanded from the Great Lakes and Chesapeake Bay pilot regions to nationwide.

Increasing Technical Assistance Capacity and Impact Measurement

USDA technical assistance through the Natural Resources Conservation Service (NRCS) is critical to enable producers to plan and implement conservation practices that are

appropriate for their needs. To ensure increased enrollment and support for producers, USDA is increasing NRCS technical assistance capacity for CRP by \$140 million.

Additionally, in order to better target the program toward climate outcomes, USDA will invest \$10 million in the CRP Monitoring, Assessment and Evaluation (MAE) program to measure and monitor the soil carbon and climate resilience impacts of conservation practices over the life of new CRP contracts. This will enable the agency to further refine the program and practices to provide producers tools for increased climate resilience.

To learn more about updates to CRP, download our “What’s New with CRP” [fact sheet](#).

Partnership Programs Contribute to Priorities

In addition to changes to CRP, Secretary Vilsack also announced significant investments for climate-smart policies. First, NRCS is investing \$330 million in 85 locally driven, public-private partnerships under the Regional Conservation Partnership Program to address climate change and other natural resources challenges. NRCS will announce more details on the RCPP project selections on April 26.

Second, NRCS is investing \$25 million in proposals for On-Farm Trials, which are part of the Conservation Innovation Grants program. NRCS is seeking proposals through June 21. Project priorities include climate-smart agricultural solutions and soil health practices.

Under the Biden-Harris Administration, USDA is engaged in a whole-of-government effort to combat the climate crisis and conserve and protect our nation’s lands, biodiversity, and natural resources including our soil, air and water. Through conservation practices and partnerships, USDA aims to enhance economic growth and create new streams of income for farmers, ranchers, producers and private foresters. Successfully meeting these challenges will require USDA and our agencies to pursue a coordinated approach alongside USDA stakeholders, including state, local, and tribal governments.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America’s food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. To learn more, visit www.usda.gov.

NRCS offers second funding opportunity for 2021 Environmental Quality Incentives Program

Alaska agricultural producers encouraged to apply for financial assistance via their local NRCS Field Office by May 14

Financial assistance is available to Alaskan agricultural producers who manage cropland, rangeland, pasture, hayland or non-industrial private forest land via the 2021 [Environmental Quality Incentives Program](#) (EQIP).

EQIP is a voluntary program administered by the USDA Natural Resources Conservation Service (NRCS) that helps agricultural producers develop a conservation plan for their property and perform conservation projects, which NRCS calls “conservation practices.”

Conservation practices are geared toward working farms, ranches and forests and provide producers with many options for conservation. Using these practices can lead to cleaner water and air, healthier soil and better wildlife habitat, all while improving agricultural operations.

NRCS Alaska is offering a second sign up period for EQIP funds this year. To be considered for the upcoming round of funding, applicants should submit their EQIP application to their local USDA Service Center by May 14.

USDA Offers Secure New Options for Signing and Sharing Documents Online

Farmers and ranchers working with USDA’s Farm Service Agency or Natural Resources Conservation Service can now sign and share documents online in just a few clicks. By using Box or OneSpan, producers can digitally complete business transactions without leaving their homes or agricultural operations. Both services are free, secure, and available for multiple FSA and NRCS programs.

Box is a secure, cloud-based site where FSA or NRCS documents can be managed and shared. Producers who choose to use Box can create a username and password to access their secure Box account, where documents can be downloaded, printed, manually signed, scanned, uploaded, and shared digitally with Service Center staff. This service is available to any FSA or NRCS customer with access to a mobile device or computer with printer connectivity.

OneSpan is a secure eSignature solution for FSA and NRCS customers. Like Box, no software downloads or eAuthentication is required for OneSpan. Instead, producers interested in eSignature through OneSpan can confirm their identity through two-factor authentication using a verification code sent to their mobile device or a personalized question and answer. Once identity is confirmed, documents can be reviewed and e-signed through OneSpan via the producer’s personal email address. Signed documents immediately become available to the appropriate Service Center staff.

Box and OneSpan are both optional services for customers interested in improved efficiency in signing and sharing documents with USDA, and they do not replace existing systems using eAuthentication for digital signature. Instead, these tools provide additional digital options for producers to use when conducting business with FSA or NRCS.

USDA Service Center staff are available to help producers get started with Box and OneSpan through a few simple steps. Please visit farmers.gov/service-locator to find your local office and let Service Center staff know you’re interested in signing and sharing

documents through these new features. In most cases, one quick phone call will be all that is needed to initiate the process.

Visit farmers.gov/mydocs to learn more about Box and OneSpan, steps for getting started, and additional resources for conducting business with USDA online.

To learn more about program flexibilities and Service Center status during the coronavirus pandemic, visit farmers.gov/coronavirus.

Persons with disabilities who require accommodations to attend or participate in these meetings and/or events should contact Lloyd Wilhelm, Northern CED, at (907) 895-4242, Erin Sturdivant, Southern CED, at (907) 761-7754 or Federal Relay Service at 1-800-877-8339.
