MYA Price=national average price received by producers during the 12-month marketing year.

Reference price (column E)=statutory price levels apply for crop years 2014-2018.

1/ F= Final MYA prices--Source: National Agricultural Statistics Service (NASS), Agricultural Prices on the publishing dates listed under column C. Exact publishing dates for 2018/19 MYA prices are unavailable, but prices are generally published near the end of the month. P=Projected MYA prices--Source: USDA's World Agricultural Supply and Demand Estimates or Interagency Commodity Estimates Committee Minutes. MYA price projections are the mid-point of the price forecast range, when applicable.

2/ The annual benchmark price equals the higher of the reference price or the respective MYA price and is used to compute annual ARC-IC benchmark revenues. The ARC-IC benchmark revenue equals the 5-year average of the annual benchmark revenues, excluding the high and low revenues. The ARC-IC revenue guarantee equals 86% of the ARC-IC benchmark revenue. Highlighted prices note when reference price is used.

3/ The actual ARC-IC price equals the higher of the: (a) 2018/19 MYA price (column K), or (b) 2018 national average loan rate (column L). The actual ARC-IC prices are multiplied by the actual ARC-IC yields and used to determine the ARC-IC actual revenue. The ARC-IC payment rate equals the average ARC-IC revenue guarantee weighted by plantings minus the average ARC-IC actual revenue weighted by plantings, but cannot exceed 10% of the benchmark revenue.

4/ Seed cotton price is a weighted average of upland cotton and cottonseed prices.

5/ Excludes temperate japonica rice.
