Rolling Out Revenue Based Disaster and Pandemic Assistance Programs

Beginning January 23, 2023, agricultural producers can begin to apply for two new important programs for revenue losses, from 2020 and 2021 natural disasters or the COVID-19 pandemic. Both programs equitably fill gaps in earlier assistance.

First, you may be eligible for assistance through the [Emergency Relief Program \(ERP\)](#) Phase Two if you experienced revenue losses from eligible natural disasters in 2020 and 2021. ERP Phase Two is for producers who didn't

receive assistance from ERP Phase One.

You may also be eligible for the [Pandemic Assistance Revenue Program \(PARP\)](#) if you experienced revenue losses in calendar year 2020. PARP is addressing gaps in previous pandemic assistance, which was targeted at price loss or lack of market access, rather than overall revenue losses.

Applications for both new programs are due June 2, 2023, and you can apply for both programs during your same appointment with USDA's Farm Service Agency (FSA).

Historically, FSA programs have been designed to make direct payments to producers based on a single disaster event or for a single commodity loss. For many of you, this may be the first revenue-based program that you've applied for with FSA.

Why revenue-based programs?

ERP Phase Two and PARP take a much more holistic approach to disaster assistance, ensuring that producers not just make it through a single growing season but have the financial stability to invest in the long-term well-being of their operations and employees.

In general, ERP Phase Two payments are based on the difference in allowable gross revenue between a benchmark year, representing a typical year of revenue for the producer and the disaster year – designed to target the remaining needs of producers impacted by qualifying natural disasters and avoid duplicative payments. ERP Phase Two revenue loss is based on tax years.

For PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and had a decrease in revenue for the 2020 calendar year, as compared to a typical year. PARP revenue loss is based on calendar years.

How to Apply

In preparation for enrollment, producers should gather supporting documentation including:

- Schedule F (Form 1040); and
- *Profit or Loss from Farming* or similar tax documents for tax years 2018, 2019, 2020, 2021 and 2022 for ERP and for calendar years 2018, 2019 and 2020 for PARP.

Producers should also have, or be prepared to have, the following forms on file for both ERP and PARP program participation:

- Form AD-2047, *Customer Data Worksheet* (as applicable to the program participant);
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity;
- Form CCC-901, *Member Information for Legal Entities* (if applicable); and
- Form AD-1026 *Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification*.
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, as certain existing permanent and ad-hoc disaster programs provide increased benefits or reduced fees and premiums.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm should contact FSA at their local [USDA Service Center](#).

Yes, FSA is stepping outside of the box.

FSA is a big proponent of agricultural producers having a say in the design, implementation and delivery of the programs that directly impact their livelihoods. We also believe that some of the most creative and useful ideas for program and process improvements come from the FSA employees who administer this assistance through our network of more than 2,100 county offices. We want to thank producers across the country, along with the entire FSA workforce, for not just thinking outside of the box but also providing their input to make sure that we can improve and enhance our programs and our approach to assistance to better and more efficiently serve all producers who need our help.

Please visit your local USDA Service Center for more information on ERP Phase Two, PARP and our full portfolio of conservation, prices support, safety-net, credit and disaster assistance programs.

Farmers Can Now Make 2023 Crop Year Elections, Enroll in Agriculture Risk Coverage and Price Loss Coverage Programs

Agricultural producers can now change election and enroll in the [Agriculture Risk Coverage \(ARC\) and Price Loss Coverage](#) programs for the 2023 crop year, two key safety net programs offered by the U.S. Department of Agriculture (USDA). Signup began Oct. 17, 2022, and producers have until March 15, 2023, to enroll in these two programs. Additionally, USDA's Farm Service Agency (FSA) has started issuing payments totaling more than \$255 million to producers with 2021 crops that have triggered payments through ARC or PLC.

2023 Elections and Enrollment

Producers can elect coverage and enroll in ARC-County (ARC-CO) or PLC, which provide crop-by-crop protection, or ARC-Individual (ARC-IC), which protects the entire farm. Although election changes for 2023 are optional, producers must enroll through a signed contract each year. Also, if a producer has a multi-year contract on the farm and makes an election change for 2023, they must sign a new contract.

If producers do not submit their election by the March 15, 2023 deadline, their election remains the same as their 2022 election for crops on the farm. Farm owners cannot enroll in either program unless they have a share interest in the farm.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Web-Based Decision Tools

In partnership with USDA, the University of Illinois and Texas A&M University offer web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- [Gardner-farmdoc Payment Calculator](#), a tool available through the University of Illinois allows producers to estimate payments for farms and counties for ARC-CO and PLC.
- [ARC and PLC Decision Tool](#), a tool available through Texas A&M that allows producers to obtain basic information regarding the decision and factors that should be taken into consideration such as future commodity prices and historic yields to estimate payments for 2022.

2021 Payments and Contracts

ARC and PLC payments for a given crop year are paid out the following fall to allow actual county yields and the Market Year Average prices to be finalized. This month, FSA processed payments to producers enrolled in 2021 ARC-CO, ARC-IC and PLC for covered commodities that triggered for the crop year.

For ARC-CO, producers can view the [2021](#) ARC-CO Benchmark Yields and Revenues online database, for payment rates applicable to their county and each covered commodity. For PLC, payments have triggered for rapeseed and peanuts.

For ARC-IC, producers should contact their local FSA office for additional information pertaining to 2021 payment information, which relies on producer-specific yields for the crop and farm to determine benchmark yields and actual year yields when calculating revenues.

By the Numbers

In 2021, producers signed nearly 1.8 million ARC or PLC contracts, and 251 million out of 273 million base acres were enrolled in the programs. For the 2022 crop year signed contracts surpassed 1.8 million, to be paid in the fall of 2023, if a payment triggers.

Since ARC and PLC were first authorized by the 2014 Farm Bill and reauthorized by the 2018 Farm Bill, these safety-net programs have paid out more than \$34.9 billion to producers of covered commodities.

Crop Insurance Considerations

ARC and PLC are part of a broader safety net provided by USDA, which also includes crop insurance and marketing assistance loans.

Producers are reminded that ARC and PLC elections and enrollments can impact eligibility for some crop insurance products.

Producers on farms with a PLC election have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider; however, producers on farms where ARC is the election are ineligible for SCO on their planted acres for that crop on that farm.

Unlike SCO, the Enhanced Coverage Option (ECO) is unaffected by an ARC election. Producers may add ECO regardless of the farm program election.

Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres for that farm.

More Information

For more information on ARC and PLC, visit the [ARC and PLC webpage](#) or contact your local [USDA Service Center](#).

Applying for FSA Direct Loans

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is \$600,000 and the maximum loan amount for direct operating loans is \$400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact the Park County FSA office 307-754-9411 ext.2. for more information or to apply for a direct farm ownership or operating loan.

Before You Break Out New Ground, Ensure Your Farm Meets Conservation ComplianceWhat are Your 2023 Conservation Resolutions?

The term “sodbusting” is used to identify the conversion of land from native vegetation to commodity crop production after December 23, 1985. As part of the conservation provisions of the Food Security Act of 1985, if you’re proposing to produce agricultural commodities (crops that require annual tillage including one pass planting operations and sugar cane) on land that has been determined highly erodible and that has no crop history prior to December 23, 1985, that land must be farmed in accordance with a conservation plan or system that ensures no substantial increase in soil erosion.

Eligibility for many USDA programs requires compliance with a conservation plan or system on highly erodible land (HEL) used for the production of agricultural commodities. This includes Farm Service Agency (FSA) loan, disaster assistance, safety net, price support, and conservation programs; Natural Resources Conservation Service (NRCS) conservation programs; and Risk Management Agency (RMA) Federal crop insurance.

Before you clear or prepare areas not presently under production for crops that require annual tillage, you are required to file Form AD-1026 “Highly Erodible Land Conservation and Wetland Conservation Certification,” with FSA indicating the area to be brought into production. The notification will be referred to NRCS to determine if the field is considered highly erodible land. If the field is considered HEL, you are required to implement a conservation plan or system that limits the erosion to the tolerable soil loss (T) for the predominant HEL soil on those fields.

In addition, prior to removing trees or conducting any other land manipulations that may affect wetlands, remember to update form AD-1026, to ensure you remain in compliance with the wetland conservation provisions.

Prior to purchasing or renting new cropland acres, it is recommended that you check with your local USDA Service Center to ensure your activities will be in compliance with the highly erodible land and wetland conservation provisions.

For additional information on highly erodible land conservation and wetland conservation compliance, contact your local USDA Service Center.
