FSA State Director Message

Through The Farm Service Agency USDA supports American Agriculture by offering direct farm payments, farm loans, and incentives to enroll farm marginal cropland and pastureland into conservation programs. In exchange for enrollment producers are paid, in varying amounts, part of the costs for establishing the conservation practices and annual rental payments based on acres enrolled and soil characteristics found in the conserved areas.

The 2023 Conservation Reserve Program signup begins Monday, February 27th and closes Friday, April 7th. Visit your local Virginia FSA Offices for program details.

Two variations of CRP, Continuous CRP and the Conservation Reserve Enhancement Program (CREP) are available and open for application throughout the year.

The Grasslands CRP is a recently new program increasing in popularity in Virginia. It's a working lands program, helping landowners and operators protect grasslands and pasture while maintaining the enrolled areas as working grazing lands. There's a limited signup period separate from the soon-to-open General CRP signup. Signup dates will be announced later this year.

In the fiscal year ended September 30, 2022 FSA paid Virginia producers over \$3-million for establishing and maintaining land in the programs highlighted above. Your local FSA office will gladly explain each of the conservation programs and the many options within each.

Dr. Ronald M. Howell, Jr., State Executive Director

NRCS State Conservationist's Message

Myth-busting on Urban Agriculture

There's been a lot of news lately concerning the increased priority that the USDA as a whole and NRCS in particular have been giving to urban agriculture, the fastest-growing segment of American food production. As new programs designed to assist urban producers have arisen, however, so have some misconceptions about who is and who isn't eligible to apply to NRCS for financial and/or technical assistance. Some examples of these myths would be:

- A property must produce at least \$1,000 of agricultural products in a given year to be designated as an "agricultural operation" and be eligible for NRCS assistance.
- Subsistence growers are not "producers" and their lands are not eligible for NRCS aid.
- Backyard gardens and community gardens are in a separate category from "real" ag production and are not eligible for NRCS' Environmental Quality Incentives Program (EQIP), the source of most of the funds to be directed to urban growers.

I'm happy to say that all three of these statements are false. The USDA's intentionally broad definition of agricultural production is "the use of cultivated plants or animals to produce products for sustaining and enhancing human life." There are no minimum values for acreage and crop revenue. Also untrue is the idea that most urban ag projects are too "small-time" to compete for aid with traditional farm operations since NRCS now offers dedicated funding pools reserved for urban projects.

The world of urban agriculture is exciting, fast-developing and open to hundreds of Virginians who may not be aware of what NRCS can offer in terms of advice and financial aid. If you'd like to start this conversation, the best way to do it is a call to the USDA field office serving your area.

Dr. Edwin Martinez Martinez, NRCS Virginia State Conservationist

Rolling Out Revenue Based Disaster and Pandemic Assistance Programs

Beginning January 23, 2023, agricultural producers can begin to apply for two new important programs for revenue losses, from 2020 and 2021 natural disasters or the COVID-19 pandemic. Both programs equitably fill gaps in earlier assistance.

First, you may be eligible for assistance through the [Emergency Relief Program \(ERP\)](#) Phase Two if you experienced revenue losses from eligible natural disasters in 2020 and 2021. ERP Phase Two is for producers who didn't receive assistance from ERP Phase One.

You may also be eligible for the [Pandemic Assistance Revenue Program \(PARP\)](#) if you experienced revenue losses in calendar year 2020. PARP is addressing gaps in previous pandemic assistance, which was targeted at price loss or lack of market access, rather than overall revenue losses.

Applications for both new programs are due June 2, 2023, and you can apply for both programs during your same appointment with USDA's Farm Service Agency (FSA).

Historically, FSA programs have been designed to make direct payments to producers based on a single disaster event or for a single commodity loss. For many of you, this may be the first revenue-based program that you've applied for with FSA.

Why revenue-based programs?

ERP Phase Two and PARP take a much more holistic approach to disaster assistance, ensuring that producers not just make it through a single growing season but have the financial stability to invest in the long-term well-being of their operations and employees.

In general, ERP Phase Two payments are based on the difference in allowable gross revenue between a benchmark year, representing a typical year of revenue for the producer and the disaster year – designed to target the remaining needs of producers impacted by qualifying natural disasters and avoid duplicative payments. ERP Phase Two revenue loss is based on tax years.

For PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and had a decrease in revenue for the 2020 calendar year, as compared to a typical year. PARP revenue loss is based on calendar years.

How to Apply

In preparation for enrollment, producers should gather supporting documentation including:

- Schedule F (Form 1040); and
- *Profit or Loss from Farming* or similar tax documents for tax years 2018, 2019, 2020, 2021 and 2022 for ERP and for calendar years 2018, 2019 and 2020 for PARP.

Producers should also have, or be prepared to have, the following forms on file for both ERP and PARP program participation:

- Form AD-2047, *Customer Data Worksheet* (as applicable to the program participant);
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity;
- Form CCC-901, *Member Information for Legal Entities* (if applicable); and

- Form AD-1026 *Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification*.
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, as certain existing permanent and ad-hoc disaster programs provide increased benefits or reduced fees and premiums.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm should contact FSA at their local [USDA Service Center](#).

Yes, FSA is stepping outside of the box.

FSA is a big proponent of agricultural producers having a say in the design, implementation and delivery of the programs that directly impact their livelihoods. We also believe that some of the most creative and useful ideas for program and process improvements come from the FSA employees who administer this assistance through our network of more than 2,100 county offices. We want to thank producers across the country, along with the entire FSA workforce, for not just thinking outside of the box but also providing their input to make sure that we can improve and enhance our programs and our approach to assistance to better and more efficiently serve all producers who need our help.

Please visit your local USDA Service Center for more information on ERP Phase Two, PARP and our full portfolio of conservation, prices support, safety-net, credit and disaster assistance programs.

FSA Offers Drought Assistance for Livestock Producers Through Emergency Assistance for Livestock, Honey Bees and Farm-raised Fish Program (ELAP)

If you've suffered above normal expenses for hauling feed or water to livestock or hauling livestock to forage/grazing acres due to the impacts of drought, you may be eligible for financial assistance through the Emergency Assistance for Livestock, Honey Bees, and Farm-Raised Fish Program (ELAP).

For eligible producers in qualifying counties, ELAP provides financial assistance for:

- the transportation of water to livestock;
- the above normal cost of mileage for transporting feed to livestock,
- the above normal cost of transporting livestock to forage/grazing acres.*

**Hauling livestock one-way, one haul per animal reimbursement and no payment for "empty miles."*

Eligible livestock include cattle, buffalo, goats and sheep, among others, that are maintained for commercial use and located in a county where the qualifying drought conditions occur. A county must have had D2 severe drought intensity on the U.S. Drought Monitor for eight consecutive weeks during the normal grazing period, or D3 or D4 drought intensity at any time

during the normal grazing period. Producers must have risk in both eligible livestock and eligible grazing land in an eligible county to qualify for ELAP assistance.

WATER TRANSPORTATION

For ELAP water transportation assistance, a producer must be transporting water to eligible livestock on eligible grazing land where the producer had adequate livestock watering systems or facilities in place before the drought occurred and where they do not normally require the transportation of water. Payments are for costs associated with personal labor, equipment, hired labor, equipment, and/or contracted water transportation fees. Cost of the water itself is not covered. The ELAP payment formula uses a national average price per gallon.

ABOVE NORMAL COSTS OF TRANSPORTING FEED

ELAP provides financial assistance to livestock producers who incur above normal expenses for transporting feed to livestock during drought. The payment formula excludes the first 25 miles and any mileage over 1,000 miles. The reimbursement rate is 60% of the costs above what would normally have been incurred during the same time period in a normal (non-drought) year. **ABOVE NORMAL COSTS OF TRANSPORTING LIVESTOCK TO FORAGE/GRAZING ACRES**

ELAP provides financial assistance to livestock producers who are hauling livestock to a new location for feed resources due to insufficient feed and/or grazing in drought-impacted areas. Assistance for Livestock transportation is retroactive to 2021 and available for 2022 and subsequent years. **Please contact your county FSA office for additional details.**

For calendar year 2022 forward, producers must submit a notice of loss to your local FSA office **within 30 calendar days** of when the loss is apparent; producers should contact their county FSA office as soon as the loss of water resources or feed resources are known. For ELAP eligibility, documentation of expenses is critical. Producers should maintain records and receipts associated with the costs of transporting water to eligible livestock, the costs of transporting feed to eligible livestock, and the costs of transporting eligible livestock to forage/grazing acres.

ELAP also offers assistance to producers impacted by wildfire. Contact your county FSA office for more information on ELAP resources for wildfire losses. In addition, beekeepers also can benefit from ELAP provisions and should contact their county FSA office within 15 calendar days of when a loss occurs or from when the loss is apparent. For more information regarding ELAP, contact your County USDA Service Center or visit fsa.usda.gov/disaster.

Foreign Buyers Notification

The Agricultural Foreign Investment Disclosure Act (AFIDA) requires all foreign owners of U.S. agricultural land to report their holdings to the Secretary of Agriculture. Foreign persons who have purchased or sold agricultural land in the county are required to report the transaction to FSA within 90 days of the closing. Failure to submit the [AFIDA form](#) could result in civil penalties of up to 25 percent of the fair market value of the property. County government offices, realtors, attorneys and others involved in real estate transactions are reminded to notify foreign investors of these reporting requirements. The data gained from these disclosures is used in the preparation of periodic reports to the President and Congress

concerning the effect of such holdings upon family farms and rural communities. Click [here](#) for more information on AFIDA.

Actively Engaged Provisions for Non-Family Joint Operations or Entities

Many Farm Service Agency (FSA) programs require all program participants, either individuals or legal entities, to be “actively engaged in farming.” This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis that is identifiable and documentable as well as separate and distinct from contributions of any other member. Members of joint operations must have a share of the profits or losses from the farming operation commensurate with the member’s contributions to the operation and must make contributions to the farming operation that are at risk for a loss, with the level of risk being commensurate with the member’s claimed share on the farming operation.

Joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation must meet additional payment eligibility provisions. Joint operations comprised of family members are exempt from these additional requirements. For 2016 and subsequent crop years, non-family joint operations can have one member that may use a significant contribution of active personal management exclusively to meet the requirements to be determined “actively engaged in farming.” The person or member will be defined as the farm manager for the purposes of administering these management provisions.

Non-family joint operations may request to add up to two additional managers for their farming operation based on the size and/or complexity of the operation. If additional farm managers are requested and approved, all members who contribute management are required to complete form CCC-902MR, *Management Activity Record*. The farm manager should use the form to record management activities including capital, labor and agronomics, which includes crop selection, planting decisions, acquisition of inputs, crop management and marketing decisions. One form should be used for each month and the farm manager should enter the number of hours of time spent for each activity under the date of the month the actions were completed. The farm manager must also document if each management activity was completed on the farm or remotely.

The records and supporting business documentation must be maintained and timely made available for review by the appropriate FSA reviewing authority, if requested.

If the farm manager fails to meet these requirements, their contribution of active personal management to the farming operation for payment eligibility purposes will be disregarded and their payment eligibility status will be re-determined for the applicable program year.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of farm manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no

circumstances may the number of farm managers in a non-family joint operation exceed a total of three in any given crop and program year.

Policy Updates for Acreage Reporting

The USDA Farm Service Agency (FSA) recently made several policy updates for acreage reporting for cover crops, revising intended use, late-filed provisions, grazing allotments as well as updated the definitions of “idle” and “fallow.”

Reporting Cover Crops:

Cover crop types can be chosen from the following four categories:

- **Cereals and other grasses**
- **Legumes**
- **Brassicas and other broadleaves**
- **Mixtures**

If the cover crop is harvested for any use other than forage or grazing and is not terminated according to policy guidelines, then that crop will no longer be considered a cover crop and the acreage report must be revised to reflect the actual crop.

Permitted Revision of Intended use After Acreage Reporting Date:

New operators or owners who pick up a farm after the acreage reporting deadline has passed and the crop has already been reported on the farm, have 30 calendar days from the date when the new operator or owner acquired the lease on land, control of the land or ownership and new producer crop share interest in the previously reported crop acreage. Under this policy, appropriate documentation must be provided to the County Committee’s satisfaction to determine that a legitimate operator or ownership and producer crop share interest change occurred to permit the revision.

Acreage Reports:

In order to maintain program eligibility and benefits, you must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

Reporting Grazing Allotments:

FSA offices can now accept acreage reports for grazing allotments. You will use form “FSA-578” to report grazing allotments as animal unit months (AUMs) using the “Reporting Unit” field. Your local FSA office will need the grazing period start and end date and the percent of public land.

Definitions of Terms

FSA defines “idle” as cropland or a balance of cropland within a Common Land Unit (CLU) (field/subfield) which is not planted or considered not planted and does not meet the definition of fallow or skip row.

Fallow is considered unplanted cropland acres which are part of a crop/fallow rotation where cultivated land that is normally planted is purposely kept out of production during a regular growing season.

For more information, contact your County USDA Service Center or visit fsa.usda.gov.

USDA To Offer Certificates for Farm Commodities Pledged to Marketing Loans

If you have crops pledged as collateral for a marketing assistance loan, you can now purchase a commodity certificate that may be exchanged for the outstanding loan collateral. Commodity certificates are available beginning with the 2015 crop in situations where the applicable marketing assistance loan rate exceeds the exchange rate. Currently, the only eligible commodity is cotton.

USDA’s Farm Service Agency (FSA) routinely provides agricultural producers with marketing assistance loans that provide interim cash flow without having to sell the commodities when market prices are at harvest time lows. The loans allow you to store and delay the sale of the commodity until more favorable market conditions emerge, while also providing for a more orderly marketing of commodities throughout the marketing year.

These loans are considered “nonrecourse” because the loan can be redeemed by delivering the commodity pledged as collateral to the government as full payment for the loan upon maturity. Commodity certificates are available to loan holders having outstanding nonrecourse loans for wheat, upland cotton, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), peanuts, wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan.

You may contact the FSA office that maintains your loan or your loan service agent for additional information. If you do business with Cooperative Marketing Associations (CMA) or Designated Marketing Associations (DMA), you may contact their respective associations for additional information. To learn more about commodity certificates, contact your County USDA Service Center or visit fsa.usda.gov/pricesupport.

FSA Can Help with On-Farm Propane Storage

Winter months in Virginia can be long and cold, and for several years, farmers have faced propane storage shortages. FSA’s [Farm Storage Facility Loan \(FSFL\) program](#) provides funding for on-farm liquified petroleum tanks.

FSFL low-interest financing can be used to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment, storage and handling trucks. Liquified

petroleum tanks are covered for eligible commodities for the use of fuel for grain dryer equipment.

Loans up to \$50,000 can be secured by a promissory note/security agreement, while loans exceeding \$100,000 require additional security.

You do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including conventional operations, small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about FSFLs and how these loans can help with your on-site propane tank storage needs, contact your County USDA Service Center or visit fsa.usda.gov.

Farmers Can Now Make 2023 Crop Year Elections, Enroll in Agriculture Risk Coverage and Price Loss Coverage Programs

Agricultural producers can now change election and enroll in the [Agriculture Risk Coverage \(ARC\) and Price Loss Coverage](#) programs for the 2023 crop year, two key safety net programs offered by the U.S. Department of Agriculture (USDA). Signup began Oct. 17, 2022, and producers have until March 15, 2023, to enroll in these two programs. Additionally, USDA's Farm Service Agency (FSA) has started issuing payments totaling more than \$255 million to producers with 2021 crops that have triggered payments through ARC or PLC.

2023 Elections and Enrollment

Producers can elect coverage and enroll in ARC-County (ARC-CO) or PLC, which provide crop-by-crop protection, or ARC-Individual (ARC-IC), which protects the entire farm. Although election changes for 2023 are optional, producers must enroll through a signed contract each year. Also, if a producer has a multi-year contract on the farm and makes an election change for 2023, they must sign a new contract.

If producers do not submit their election by the March 15, 2023 deadline, their election remains the same as their 2022 election for crops on the farm. Farm owners cannot enroll in either program unless they have a share interest in the farm.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Web-Based Decision Tools

In partnership with USDA, the University of Illinois and Texas A&M University offer web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- [Gardner-farmdoc Payment Calculator](#), a tool available through the University of Illinois allows producers to estimate payments for farms and counties for ARC-CO and PLC.
- [ARC and PLC Decision Tool](#), a tool available through Texas A&M that allows producers to obtain basic information regarding the decision and factors that should be taken into consideration such as future commodity prices and historic yields to estimate payments for 2022.

2021 Payments and Contracts

ARC and PLC payments for a given crop year are paid out the following fall to allow actual county yields and the Market Year Average prices to be finalized. This month, FSA processed payments to producers enrolled in 2021 ARC-CO, ARC-IC and PLC for covered commodities that triggered for the crop year.

For ARC-CO, producers can view the [2021](#) ARC-CO Benchmark Yields and Revenues online database, for payment rates applicable to their county and each covered commodity. For PLC, payments have triggered for rapeseed and peanuts.

For ARC-IC, producers should contact their local FSA office for additional information pertaining to 2021 payment information, which relies on producer-specific yields for the crop and farm to determine benchmark yields and actual year yields when calculating revenues.

By the Numbers

In 2021, producers signed nearly 1.8 million ARC or PLC contracts, and 251 million out of 273 million base acres were enrolled in the programs. For the 2022 crop year signed contracts surpassed 1.8 million, to be paid in the fall of 2023, if a payment triggers.

Since ARC and PLC were first authorized by the 2014 Farm Bill and reauthorized by the 2018 Farm Bill, these safety-net programs have paid out more than \$34.9 billion to producers of covered commodities.

Crop Insurance Considerations

ARC and PLC are part of a broader safety net provided by USDA, which also includes crop insurance and marketing assistance loans.

Producers are reminded that ARC and PLC elections and enrollments can impact eligibility for some crop insurance products.

Producers on farms with a PLC election have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider; however, producers on farms where ARC is the election are ineligible for SCO on their planted acres for that crop on that farm.

Unlike SCO, the Enhanced Coverage Option (ECO) is unaffected by an ARC election. Producers may add ECO regardless of the farm program election.

Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres for that farm.

More Information

For more information on ARC and PLC, visit the [ARC and PLC webpage](#) or contact your local [USDA Service Center](#).

Applying for FSA Direct Loans

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is \$600,000 and the maximum loan amount for direct operating loans is \$400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

Applying for FSA Guaranteed Loans

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to \$2,037,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan.

Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

For more information on guaranteed loans, contact your County USDA Service Center or visit fsa.usda.gov.

Application Deadline Set for USDA's Urban Agriculture Innovation Program

The USDA's [Office of Urban Agriculture and Innovative Production](#) has posted a Notice of Funding Opportunity for its Urban Agriculture and Innovative Production Competitive Grants Program. Individuals and groups seeking to apply for funding during Fiscal Year 2023 must submit applications using the Grants.gov website by 11:59 p.m. (Eastern time) on Monday, March 27, 2023.

Urban Agriculture and Innovation Production (UAIP) competitive grants initiate or expand efforts of farmers, gardeners, citizens, government officials, schools and other stakeholders in urban areas and suburbs. Projects may target areas of food access; education; business and start-up costs for new farmers; and development of policies related to zoning and other needs for urban production.

Funding for UAIP and many other USDA programs is competitive in nature. To maintain the integrity of the application process, USDA employees will not aid in drafting of proposals nor provide any applicant with a potential undue advantage against another.

Links to the full public announcements of the grants and the funding process are provided below:

- [USDA Announces Grants for Urban Agriculture and Innovative Production](#)
- [FY 2023 UAIP Notice of Funding Opportunity](#)

If you have any questions or wish to request more information, please free to contact your local NRCS field office.

Selected Interest Rates for February

90-Day Treasury Bill	4.375%
Farm Operating Loans — Direct	4.750%
Farm Ownership Loans — Direct	4.750%
Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher	1.500%

Emergency Loans 3.750%

Farm Storage Facility Loans - (7 years) 3.750%

Commodity Loans 1996-Present 5.750%
