## USDA Announces Conservation Reserve Program Signups for 2022

Agricultural producers and landowners can sign up soon for the Conservation Reserve Program (CRP), a cornerstone conservation program offered by the U.S. Department of Agriculture (USDA) and a key tool in the Biden-Harris Administration effort to address climate change and achieve other natural resource benefits. The General CRP signup will run from **Jan. 31 to March 11**, and the Grassland CRP signup will run from **April 4 to May 13**.

Producers and landowners enrolled 4.6 million acres into CRP signups in 2021, including 2.5 million acres in the largest Grassland CRP signup in history. There are currently 22.1 million acres enrolled, and FSA is aiming to reach the 25.5-million-acre cap statutorily set for fiscal year 2022.

### CRP Signups

General CRP helps producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland.

Meanwhile, Grassland CRP is a working lands program, helping landowners and operators protect grassland, including rangeland and pastureland and certain other lands, while maintaining the areas as working grazing lands. Protecting grasslands contributes positively to the economy of many regions, provides biodiversity of plant and animal

populations and provides important carbon sequestration benefits to deliver lasting climate outcomes.

Alongside these programs, producers and landowners can enroll acres in Continuous CRP under the ongoing sign up, which includes projects available through the Conservation Reserve Enhancement Program (CREP) and State Acres for Wildlife Enhancement (SAFE).

### **Climate Benefits**

Last year, FSA enacted a Climate-Smart Practice Incentive for CRP General and Continuous signups, to better target CRP on addressing climate change. This incentive aims to increase carbon sequestration and reduce greenhouse gas emissions. CRP's climate-smart practices include establishment of trees and permanent grasses, development of wildlife habitat and wetland restoration. The Climate-Smart Practice Incentive is annual, and the amount is based on the benefits of each practice type.

Additionally, in order to better target the program toward climate outcomes, USDA invested \$10 million last year in the CRP Monitoring, Assessment and Evaluation (MAE) program to measure and monitor the soil carbon and climate resilience impacts of conservation practices over the life of new CRP contracts. This will enable the agency to further refine the program and practices to provide producers tools for increased climate resilience.

### **More Information on CRP**

Landowners and producers interested in CRP should contact their local [USDA Service Center](#) to learn more or to apply for the program -- for General CRP before the **March 11 deadline**, and for Grassland CRP before the **May 13 deadline**. Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Due to the pandemic, some [USDA Service Centers](#) are open to limited visitors. Additionally, fact sheets and other resources are available at [fsa.usda.gov/crp](https://fsa.usda.gov/crp).

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits.

## **USDA Opens 2022 Signup for Dairy Margin Coverage, Expands Program for Supplemental Production**

USDA opened signup for the Dairy Margin Coverage (DMC) Program and expanded the program to allow dairy producers to better protect their operations by enrolling supplemental production. This signup period – which runs from Dec. 13, 2021 to Feb. 18, 2022 – enables producers to get coverage through this important safety-net program for another year as well as get additional assistance through the new Supplemental DMC. To determine the appropriate level of DMC coverage for a specific dairy operation, producers can use the [online dairy decision tool](#).

## Feb. 4 Deadline for the Organic and Transitional Education and Certification Program

Feb. 4 is the deadline for agricultural producers who are certified organic, or transitioning to organic, to apply for the Organic and Transitional Education and Certification Program (OTECP). Signup for OTECP, administered by USDA's Farm Service Agency (FSA), began Nov. 8.

Certified operations and transitional operations may apply for OTECP for eligible expenses paid during the 2020 and 2021 fiscal years during this signup period. Signup for the 2022 fiscal year will be announced at a later date.

For each year, OTECP covers 25% of a certified operation's eligible certification expenses, up to \$250 per certification category (crop, livestock, wild crop, handling and State Organic Program fee). This includes application fees, inspection fees, USDA organic certification costs, state organic program fees and more.

Crop and livestock operations transitioning to organic production may be eligible for 75% of a transitional operation's eligible expenses, up to \$750, for each year. This includes fees charged by a certifying agent or consultant for pre-certification inspections and development of an organic system plan.

For both certified operations and transitional operations, OTECP covers 75% of the registration fees, up to \$200, per year, for educational events that include content related to organic production and handling in order to assist operations in increasing their knowledge of production and marketing practices that can improve their operations, increase resilience and expand available marketing opportunities. Additionally, both certified and transitional operations may be eligible for 75% of the expense of soil testing required under the National Organic Program (NOP) to document micronutrient deficiency, not to exceed \$100 per year.

Producers apply through their local FSA office and can also obtain one-on-one support with applications by calling 877-508-8364. The program application and additional information can be found at [farmers.gov/otecp](https://farmers.gov/otecp).

### Additional Organic Support

OTECP builds upon USDA's [Organic Certification Cost Share Program \(OCCSP\)](#) which provides cost share assistance of 50%, up to a maximum of \$500 per scope, to producers and handlers of agricultural products who are obtaining or renewing their certification under the NOP. Although the application period for OCCSP ended Nov. 1, 2021, FSA will consider late-filed applications for those operations who still wish to apply.

Meanwhile, USDA's Risk Management Agency (RMA) recently [made improvements to Whole-Farm Revenue Protection](#) to make it more flexible and accessible to organic producers.

To learn more about USDA's broader assistance for organic producers, visit [usda.gov/organic](https://usda.gov/organic).

## Loans for Targeted Underserved Producers

The Farm Service Agency (FSA) has several loan programs to help you start or continue an agriculture production. Farm ownership and operating loans are available.

While all qualified producers are eligible to apply for these loan programs, FSA has provided priority funding for members of targeted underserved applicants.

A targeted underserved applicant is one of a group whose members have been subjected to racial, ethnic or gender prejudice because of his or her identity as members of the group without regard to his or her individual qualities.

For purposes of this program, targeted underserved groups are women, African Americans, American Indians, Alaskan Natives, Hispanics, Asian Americans and Pacific Islanders.

FSA loans are only available to applicants who meet all the eligibility requirements and are unable to obtain the needed credit elsewhere.

---

## USDA Microloans Help Farmers Purchase Farmland and Improve Property

Farmers can use USDA farm ownership microloans to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013.

Microloans can also help with farmland and building purchases and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program, visit [fsa.usda.gov/microloans](https://fsa.usda.gov/microloans).
